### Upward Bound

**What:** Upward Bound helps low-income, first-generation high school students enroll in college. A component of that program is CyberTutoring, one-on-one tutoring sessions conducted over Skype. Upward Bound is looking for caring and committed people to spend one to two hours a week online, tutoring some very remarkable kids so that they improve their grades and have a chance to reach their full potential. As a college student, you would especially be able to relate to these teenagers and understand their needs on many levels.

**Who:** Tutors from local college campuses

**Why:** You can make a difference in the life of a high school student from an under-served Los Angeles neighborhood who is working extremely hard to graduate and be the first in their family to go to college. One semester of online tutoring has proven to advance a student one grade, and impacts their lives immeasurably. Being a tutor is a very rewarding experience on a personal level, and is a great addition to your resume. Upward Bound programs have been in Los Angeles for more than 300 students each year with a 100% success rate and have helped thousands of teenagers make it to college. This is especially noteworthy as the kids are educated in overcrowded inner-city schools with high dropout rates, low academic performance, and less college-going culture.

How: Please email [Tutor@voala.org](mailto:Tutor@voala.org) for information on becoming a Cyber Tutor.
